

OPTENET SECURITY SUITE PC

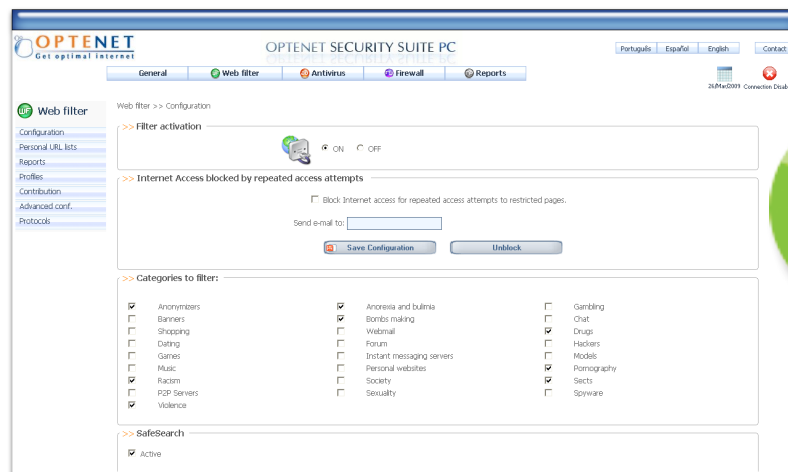

100% INTERNET SECURITY

SECURITY SUITE DESIGNED TO PROTECT HOME COMPUTERS FROM ALL INTERNET THREATS IN A WEB 2.0 WORLD

Optenet Security Suite PC is a complete security solution designed to protect home computers. It protects against every type of Internet threat, guaranteeing secure and effective browsing, with a particular emphasis on making the Internet safe for children.

The solution combines parental control, firewall and antivirus functionalities in a single product, and is backed by Optenet's experience in home protection around the world.

The product is user friendly, intuitive and easy to manage. It enables parents to manage and control their children's Internet access by establishing policies that block unsuitable websites, restrict browsing time, control access to forums, and so on, all with one easy to manage system. It also allows browsing schedules to be set, restricts file downloading and control P2P applications (Skype, eMule), Instant Messaging, Chats, etc.

BENEFITS

PC free of viruses and spyware

Block hackers and prevent theft of confidential data

Prevent the loss of important files

Maintain optimum performance of your computer

OPTENET'S TECHNOLOGY

Critical in ensuring accurate blocking in the dynamic world of Web 2.0 is the ability to categorize traffic in real time. Optenet's Global Intelligence Acquisition Network for Threats (Optenet GIANT™) is constantly receiving input from Internet sources around the world, and pushing these updates out to every Optenet solution – ensuring that new threats and malware are properly blocked.

Utilizing Optenet GIANT™ as a key data source, Optenet's Multicontent Inspection and Dynamic Analysis System (Optenet MIDAS™) inspects video, text and images and properly categorizes the data in real time.

Over 75 million people worldwide use Optenet technology to keep their family safe on the Internet.

Full protection against next generation Internet and mail threat

Web 2.0 and the proliferation of dynamic content provide new avenues for today's advanced hackers to harm or attack precious electronic assets. Using the most advanced and comprehensive set of real-time content analysis techniques, along with industry leading malware signatures, Optenet Security Suite PC offers home users the most effective real-time protections against harmful attacks.

Best malware protection engine

Optenet Security Suite PC incorporates the Kaspersky Lab antivirus detection system, guaranteeing detection of malicious HTML code. Kaspersky technology provides superior detection of viruses, trojans and worms, as well as spyware, adware, rootkits and all types of malware.

Easy to install

Optenet Security Suite PC requires no technical knowledge. It is designed so that you do not have to configure the solution. Just install it and it's ready to go! Nevertheless, there are many features for advanced users, such as personal lists, different user profiles, etc. Additionally, on-screen help is available at any time.

Optenet Security Suite PC is designed to offer safer Internet browsing, with the highest levels of security and protection thanks to antivirus, antispyware and firewall technology:

Content Filter

- Configuration options: filtering by category and file type (compressed files, images, multimedia, programs)
- Browsing schedules
- Filtering profiles
- Customizable lists of allowed and prohibited websites
- Block Internet access in the event of repeated attempts to access prohibited pages
- Block P2P, chat, e-mail, instant messaging, etc.

Antivirus

- Protection against viruses, trojans and worms
- Protection against spyware and unwanted advertising
- Scanning, cleaning and disinfection of files
- Scanning of e-mails and Internet traffic

Firewall

- Protection against hackers and intruders
- Control application access to the Internet
- Customizable protection levels
- Reportings
- Information and statistics on traffic and filtering

Optenet software is compatible with the most frequently used operating systems, including:

- Windows Vista
- Windows XP
- Windows 2000

Processor: Pentium or compatible.

RAM Memory: 64MB or more.

ABOUT OPTENET

Optenet is a global IT security company that provides high-performance security solutions to service providers and large enterprises worldwide.

Optenet's technology protects 75 million end users around the globe, including customers of many of the world's leading ISPs and mobile operators, as well as employees of global enterprise organizations.

The Company is a socially conscious organization, committed to eliminating illegal content on the Internet, protecting children and supporting government agencies and non-profit organizations that share the same goal.
